

ESPI Current Report

Number: 10/2020
Date: 25 March 2020
Company: XTPL S.A., a joint stock company with its registered office in Wrocław

Topic: Implementation of the next order of nano-ink for a new contractor

Legal basis: Article 17(1) MAR – inside information

Contents of the Report: The Management Board of XTPL S.A. (“Company”, “Issuer”) informs about the execution of the next order for the supply of nano-ink. Delivery is carried out for a new contractor from EMEA region which is operating on the display market as well as on several others advanced electronics’ sectors.

With the contractor for which the delivery is being carried out the Company is conducting talks regarding the commercialization of the developed technology. The purchase of a nano-ink is another step to the implementation of the Issuer's technology in the solutions offered by the abovementioned contractor.

The Management Board of the Company considered the fact of commercial sale of the nano-ink to another contractor as inside information, because in the opinion of the Management Board it confirms the transition to the next, more advanced phase of business relations with this contractor, which increases the probability of commercialization of the technology developed by the Company.

The amount of revenue from delivery is insignificant from the point of view of potential cooperation with the partner. However, the mere fact of this commercial order is significant from the point of view of the Company and at the same time confirms the possibility to start cooperation with the contractor in terms of entering the market in the client's industry.

Signatures of the Company’s representatives:

FILIP GRANEK
PRESIDENT OF THE MANAGEMENT BOARD
