

## ESPI Current Report

**Number:** 47/2020  
**Date:** 23 November 2020  
**Company:** XTPL S.A., a joint stock company with its registered office in Wrocław

**Topic:** Conclusion of a lease-purchase agreement for the Issuer's Delta printer

**Legal basis:** Article 17(1) MAR – inside information

**Contents of the Report:** The Management Board of XTPL S.A. (the “Issuer”) hereby announces that on 23 November 2020 an agreement was signed between the Issuer and the University of Stuttgart, Institute for Large Area Microelectronics (“Institute”) on leasing the Issuer's “Delta” printer with an option of its purchase by the Institute (the “Agreement”).

The Institute is a globally recognized research unit which develops the Flat Panel Display technology and cooperates with the largest display manufacturers.

The maximum duration of the agreement is 48 months, and its maximum value is approx. EUR 190 thousand net (approx. PLN 880 thousand net).

The value of the agreement does not include the supply of consumables: cartridges, inks, and nozzles, which will constitute additional income for the Issuer.

The Issuer's Management Board has decided that the conclusion of the first commercial lease-purchase agreement for the Delta printer is inside information because in the Management Board's opinion this means confirmation of commercialization of the technology developed by the Issuer. Taking into account the Institute's reputation, this opens up an additional channel for presenting the Issuer's technology to global display manufacturers.

The very fact of signing a commercial contract is important from the Issuer's point of view and confirms the possibility of starting cooperation with partners from the display sector with regard to the Issuer's entry into the display market.
