

## ESPI Current Report

**Number:** 20/2021  
**Date:** 5 November 2021  
**Company:** XTPL S.A., a joint stock company with its registered office in Wrocław

**Topic:** Signing an agreement with the University of Glasgow for the sale of the Delta Printing System

**Legal basis:** Article 17(1) MAR – inside information

**Contents of the Report:** The Management Board of XTPL S.A. [the “Issuer”, “Company”] announces that on 5 November 2021 the Company accepted and confirmed an order from the Bendable Electronics and Sensing Technologies [“BEST”] research group from the University of Glasgow, Scotland, for delivery of the Company's technology demonstrator: the Delta Printing System printer.

The Issuer accepted the order, which means that a sales contract was formed. The Issuer will deliver and commission the device by the end of 2021. BEST will use it for research and development related to bendable electronics.

BEST is a multidisciplinary research group with over 30 PhDs in science (chemistry, physics, materials) from over 25 countries. The group's research revolves around the development of high-performance electronics and sensing systems on large area flexible substrates. In addition, the group investigates advanced materials for next generation flexible, printed, and stretchable electronics. To this end, BEST researchers are looking for possibilities to develop novel fabrication and manufacturing techniques. In its research, BEST uses tailored state-of-the-art micro/nanofabrication tools.

The Management Board of XTPL S.A. has decided that the receipt and acceptance of the order is inside information due to its significant value and its importance in the context of the Company's current business size. The revenue from the order will have a positive impact on XTPL's financial performance in 2021. In addition, the cooperation with the BEST research team is an opportunity for the Issuer to expand its sales markets due to the research group's reputation and its close relations with industrial partners from the electronics industry, which may affect the Issuer's development prospects and its future financial position.

Accordingly, in the Management Board's opinion, the information on the sale of the Delta Printing System meets the criteria of inside information within the meaning of Article 7(1) MAR.
