

## ESPI Current Report

**Number:** 38/2022  
**Date of preparation:** 16 December 2022  
**Company:** XTPL S.A., a joint stock company with its registered office in Wrocław

### Title:

**Achievement of the forecast in terms of the number of patent applications filed**

**Legal basis:** Article 17(1) MAR – inside information

### Contents of the Report:

With reference to Current Report No. 40/2019 of 5 September 2019 and Current Report No. 45/2020 of 23 November 2020, the Management Board of XTPL S.A. ["Issuer", "Company", "XTPL"] hereby reports that on 16 December 2022, it filed an application for patent protection concerning precise 3D positioning of samples. In this way, the Company has reached the number of 26 patent applications filed (with related inventions combined) since 1 September 2019.

The building of a patent cloud for the proprietary technology and products is an essential part of the Company's strategy, which raises the Issuer's credibility among potential industrial clients. The patent protection obtained as a result of the filings will increase the value of the potential commercialization of the Company's technology with respect to industrial implementations.

The Company plans to file more patent applications for inventions to be developed in the course of current and future research and development. However, the Company does not communicate forecasts regarding the number of new patent applications for the coming years. Due to the number of existing patent applications, the Company does not report on new patent applications via the ESPI channel. Information on the number of patent applications is collectively provided in financial reports.

For this reason, in the opinion of the Management Board, the information about achievement of the forecast number of patent applications meets the criteria set out in Article 7(1) of the MAR.
