

## Notice of allowance and allowed claims

notice of allowance and information related to allowed claims issued by the United States Patent and Trademark Office. The patent application has been examined and is allowed for issuance as a patent for an invention "Method of forming a feature by dispensing a metallic nanoparticle composition from an ink-jet print head and a metallic nanoparticle composition for ink-jet printing."

The application procedure for this patent was initiated on 12 February 2021. This is also the date when patent protection started for the invention. The final formal requirement for obtaining the patent is to pay the necessary fee. Should the requirement not be met, the Company will communicate this in a separate current report.

The Company's portfolio currently includes 29 patent grant procedures (patent applications and patent families), and a total of 28 patents granted. The increase in the number of patents, from the previously reported 9 patents, is the result of a change in counting methodology - now, obtaining protection for a given invention is counted for each location (country) separately.

The patent protection will increase the value of the potential commercialization of the Company's technology with respect to the Issuer's technological solutions for the next generation electronics market. The reported event confirms continued delivery of the Company's strategy of building a patent cloud for its proprietary technology and products, which will contribute to building the Issuer's credibility among potential industrial clients.

In view of the above, and considering the confirmation of uniqueness of the Company's technological solutions, and then the outlook for the Issuer's perception by investors, the Issuer's Management Board has decided that the notice of allowance and information related to allowed claims should be deemed confidential information. For this reason, in the opinion of the Management Board, the information meets the criteria set out in Article 7(1) of the MAR.
